

1 test case, 1 bug report, and 1 other piece of documentation (a test plan, another case, or another bug report).

**This test will verify that the game can be played correctly.**

Open the website link where the game is located  
Click on the draw button  
Then click on add to due button on two different robots  
After that click duel  
After that click play again.

---

**BUG ID: 2399**

**Steps to reproduce:**

Open the website link where the game is located  
Click on the draw button  
Then click on add to due button on two different robots  
After that click duel  
After that click play again.  
Expected result: If you won the round, the number for won rounds should go up  
Actual result: Whether you won or lost, the number for losses keeps going up.

---

**This test will verify that you can change robots even after you've selected 2.**

Open the website link where the game is located  
Click on the draw button  
Then click on add to due button on two different robots  
Click on the button Remove from duo on one of the robots  
Proceed to choose a new robot.  
After that click duel
